

# CELL PHONE PANIC

Your cell phone acts as a panic button and works independently of your alarm system.

## Step 1

Save 24/7 Security's Cell React PANIC number on your phone. Save the number as a new contact person.

**PANIC 083 235 8558**

## Step 2

Allocate the panic number to a **Speed Dial, Direct Contact Icon or Favourite Contact** (depending on your type of phone).

## Step 3

**In an emergency, Press the speed dial.**

Your phone will dial out, the call will connect and then automatically disconnect.

*NB. the call is NOT answered.*

## Step 4

The 24/7 Control Room will immediately call you back.

If you do not answer their call, or if you cannot speak, the armed response vehicle will be dispatched to your home address in Parkview.

There is **no need to identify yourself** or to give your address.

Samsung - use a "Favourite contact" Direct Dial Icon on your home screen

## Step 5

If you are not at your armed response address, you can answer their call and direct 24/7 to your current location in Parkview.

Blackberry - use the Speed Dial function and allocate to "P" for Panic

I-Phone - add the panic number to your Favourite Contacts List

Phones with a key pad - use the Speed Dial function and allocate to number "5" in the centre
